

Packing Success in Film worldwide

NORDENIA POLSKA Poznan Sp. z o.o.

CUSTOM-MADE FLEXIBILITY

NORDENIA POLSKA Poznan supplies innovative packaging solutions to the Polish and international markets.

The flexible films and consumer goods packaging are characterized by their optimum printing quality and technical perfection.

Quality control: Products made in Poznan meet the highest demands.

CORE COMPETENCIES

- Flexible films in the highest production quality
- Optimum printing quality up to nine colors
- Individual solutions with on-site advice
- Certified in accordance with ISO 9001:2000, ISO 14001, HACCP

NORDENIA has been manufacturing premium packaging films at the site in Dopiewo since 1998.

QUALITY WITH HIGH STANDARDS

Since 1998 NORDENIA POLSKA Poznan has produced flexible packaging with a qualified workforce and the latest technical equipment. The Dopiewo site near Poznan manufactures cold-seal coated films, premium composite films, and pre-made bags. All films and packaging are tailored to the customer's individual requirements and are available in greatly differing variants.

This is no problem thanks to the solvent-containing or solvent-free laminating process and the latest gravure printing technology with up to nine colors. Naturally, NORDENIA POLSKA Poznan is certified for its quality, environmental and hygiene management systems in accordance with EU standards as well as with the international ISO 9001:2000, ISO 14001 and HACCP standards.

CUSTOM-MADE IDEAS, INDIVIDUAL PACKAGING

NORDENIA POLSKA Poznan goes for long-lasting partnerships with its customers. High flexibility and a local presence are essential for this. To guarantee the trouble-free further processing of the products on the customers' machines and filling and bottling installations,

NORDENIA POLSKA Poznan offers, for example, fast and comprehensive on-site advice. In the search for individual solutions, the site not only cooperates with regional partners in Poland but also with multinational manufacturers from the consumer goods sector.

State-of-the-art machines like this laminator are used to produce custom-made film products.

NORDENIA's consumer packaging is suited for cleaning tablets or cigarettes.

Cold-seal coated films are used to pack candy, among other products.

The films distinguish themselves by having an excellent print quality.

ALIGNED TO VARIED DEMANDS

Consumer-goods packaging made by NORDENIA POLSKA Poznan is used in extremely different market segments – not least thanks to the numerous optional functions and facilities and the fact that it meets the demands of the customers and, above all, of the final consumers optimally.

NORDENIA makes packaging for the food sector with barrier functions, reclosable systems, easy opening devices, or cold-seal application, among other properties. Films with special aroma and gas barriers are used, for example, for coffee, cheese, and meat.

Monostructures are used frequently for packing ice cream, frozen foods, or snack bars. Sterilizable composites made by NORDENIA POLSKA Poznan are suitable for instant soups and sauces. Finally, along with twistwrap films, miniwrap mono- and composite materials are particularly suited for packing candy. They can be sealed very quickly and can therefore be used even with very high packing speeds.

High-quality films from Poznan are also used to pack cigarettes, pet food, detergents, and products from the beauty and healthcare industry.

NORDENIA offers the ideal solution for every type of content.

RESEARCH AND DEVELOPMENT

Innovativeness is deeply rooted within NORDENIA's company culture. As a pioneer who invests in innovations, NORDENIA develops market-oriented, and value-adding products and processes. The strategic product and process development as well as product optimization are

concentrated in NORDENIATECHNOLOGIES GmbH, the Group's development company. In cooperation with its customers and suppliers, NORDENIA works for the future of film packaging all over the world. A high utility value and innovative functions are the top priority.

One of the strengths of NORDENIA is the constant enhancement of successful products.

NORDENIA WORLDWIDE

NORDENIA INTERNATIONAL AG is an international manufacturer of flexible packaging, technical films, and product components. The business is divided into the Consumer and Industrial divisions. The NORDENIA INTERNATIONAL AG management headquarters are located in Greven, Germany. Approximately 3,000 employees work for the films company. The company's

common principles (shared values) are the basis for its actions. By adopting the seven shared values, Flexibility, Global, Independence, Innovation, Partnership, Passion for Excellence, and Quality, NORDENIA has incorporated a company culture that promotes global partnerships.
